DETAILED ACTION

Specification

1. The abstract of the disclosure is objected to because the form and legal phraseology often used in patent claims, such as "means," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details. Correction is required. See MPEP § 608.01(b).

Claim Objections

2. Applicant is advised that should claim 7 be found allowable, claim 12 will be objected to under 37 CFR 1.75 as being a substantial duplicate thereof. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

Claim Rejections - 35 USC § 112

- 3. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 4. Claims 3, 4, and 9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 3, redundant elements make it unclear as to whether bodies are claimed. In claim 9, recitation of "the common part" lacks sufficient antecedent basis and it is unclear whether the diameter of the first end is an internal diameter and smaller that the internal diameter of the common part.

Art Unit: 3732

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 6. Claims 1 and 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Manciocchi, Jr. (4,509,541). Manciocchi, Jr. discloses a device comprising a tubular guide element 12 having an axis and a first profiled open end, cleaning means 18 mounted movably in the tubular guide element and having an axis, support means 22 having a first end and a second end and a fixed longitudinal direction relative to the axis of the guide element, the cleaning means fixed at the first end of the support means and having the axis constrained to remain coincident with the axis of the guide element, gripping means 10 comprising a tubular body having an axis aligned with the axis of the guide element, the body surrounding the guide element and having a open first end and a second end connected to the second end of the support means, and return means 34, 36 interposed between the second end of the tubular body and the second end of the guide element (figures 2,3, column 2 line 49). The support means comprise a rod and having the first end integral with the cleaning means and the second end integral with the body.

Claim Rejections - 35 USC § 103

- 7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Application/Control Number: 10/645,531 Page 4

Art Unit: 3732

8. Claims 4, 7-10, and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Manciocchi, Jr. in view of Yang (5,868,149). Manciocchi, Jr. discloses a device that shows the limitations as described above; however, Manciocchi, Jr. does not show the return means being a helical spring. Yang teaches a device with a helical spring 5 surrounding the rod and interposed between the guide element and gripping body. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the return means of Manciocchi, Jr. with the return means of Yang to be able to move the rod by pressing in view of Yang as opposed to rotating. Yang teaches a cleaning means comprising an interdental brush in the prior art in order to clean the food remains better or to have the massage function. Yang teaches the first profiled end is frustoconical in order to enable the user to easily direct the device with the tapered end in view of Yang. As understood, Yang teaches the cleaning means fitting in the guide element and different diameters of the guide element. It would have been an obvious matter of choice to one of ordinary skill in the art as to the cleaning means being detachable from the support means, since it has been held that constructing a formerly integral structure in various elements involves only routine skill in the art. Nerwin v. Erlichman, 168 USPQ 177,179.

Response to Arguments

9. Applicant's arguments with respect to the rejected claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Melba Bumgarner whose telephone number is 571-272-4709. The examiner can normally be reached on Mon-Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kevin Shaver can be reached at 571-272-4720. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
